Please read this user manual first!

Dear Customer,

Thank you for choosing Whirlpool product.

Please register your product at www.register10.eu.

We hope that you get the best results from your product which has been manufactured with high quality and state-of-the-art technology. Therefore, please read this entire user manual and all other accompanying documents carefully before using the product.

Follow all warnings and information in the user manual. Thus, you protect yourself and your product against possible dangers.

Keep the user manual. If you hand over the product to someone else, provide the user manual as well. Warranty terms, usage and troubleshooting methods of your product are in user manual.

Symbols and Definitions

The following symbols are used in the user manual:

	Danger that could result in death or injury.
	Important information or useful hints about usage.
	Read the user manual.
	Recyclable materials.
 	Hot surface warning.
WARNING	Danger that may result in property damage to the product or its environment.

1 Safety Instructions

Important to Be Read and Observe

Before using the appliance, read these safety instructions. Keep them nearby for future reference. These instructions and the appliance itself provide important safety warnings, to be observed at all times. The manufacturer declines any liability for failure to observe these safety instructions, for inappropriate use of other appliance or incorrect setting of controls. The warranty conditions are specified in the document accompanying the appliance.

- Keep very young children (0-3 years) away from the appliance. Keep young children (3-8 years) away from the appliance unless they are continuously supervised. Children aged 8 and over, as well as individuals with reduced physical, sensory or mental capabilities or individuals with lack of knowledge and experience can use the appliance only under supervision or after receiving clear instructions on safe use and understanding the possible risks. Children must not play with the appliance. Children must not perform cleaning and maintenance tasks

without supervision. Do not force the door open or use it as a step.

- Do not stop the appliance before the drying cycle ends. If you must stop it, remove all items immediately and spread the items out to dissipate heat.
- Do not dry items soiled with flammable substances. These include cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes or wax removers.
- Do not dry foam rubber, latex foam, shower caps, waterproof textiles, rubber-backed articles or clothes with foam rubber pads.
- Remove all objects such as lighters and matches from pockets.
- Do not use the appliance if industrial chemicals cleaned it.
- Do not dry oil-soaked items. These materials are highly flammable.
- Keep the water tap turned on during drying cycles.

1.1 Permitted Use

- The appliance is not intended to be operated by means of an external switching device, such as a timer, or separate remote controlled system.
- This appliance is intended for household use and similar applications listed as follows:
 - Staff kitchens in shops, offices, and other work environments
 - Farmhouses
 - Hotels, motels, bed & breakfast and other residential environments
 - Communal areas in apartment buildings or laundromats
- Do not load the appliance above the maximum capacity (kilogram of dry cloth) indicated in the programme table.
- This appliance is not for professional use. Do not use the appliance outdoors.
- Do not use any solvents (e.g. turpentine, benzene), detergents containing solvents, scouring powder, glass or general purpose cleaners, or flammable fluids. Do not machine wash fabrics that have been treated with solvents or flammable liquids.

- Do not store explosive or flammable substances near or inside the appliance. Examples include gasoline and aerosol cans.
- Do not dry unwashed items in the appliance.
- Keep the area around the appliance free of lint and dust.
- Use fabric softeners or similar products only as instructed on their packaging.
- Do not overdry the laundry.
- Do not use the appliance to dry foam rubber or similar elastomers.

1.2 Installation

- This appliance requires two or more people to handle and install to prevent injuries. Wear protective gloves during unpacking and installation to avoid cuts.
- Do not install the appliance in places where it may be exposed to extreme conditions such as poor ventilation, temperatures below 5 °C or above 35 °C.
- Move the appliance without lifting it by the worktop or top lid.

- Installation, including water supply (if any) and electrical connections and repairs must be carried out by a qualified technician.
- Do not repair or replace any part of the appliance unless specifically stated in the user manual.
- Keep children away from the installation site.
- After unpacking the appliance, make sure that it has not been damaged during transport. In the event of problems, contact the dealer or your nearest After-Sales Service.
- After installing the appliance, keep the packaging waste (plastic, styrofoam, etc.) out of the reach of children to avoid the risk of suffocation.
- Before any installation operation, disconnect the appliance from the power supply to avoid electric shock.
- During installation, ensure the power cable is not damaged to prevent fire or electric shock.
- Do not operate the appliance until installation is complete.
- When installing the appliance, make sure that the four feet are stable and resting on the floor, adjusting them as required. Check that the appliance is perfectly to level using a spirit level.
- When installing the appliance on wood or floating floors (certain parquet and laminate types), place a 60 x 60 x 3 cm (minimum) plywood sheet under the appliance to provide stability.
- Connect the water inlet hose(s) to the water supply in accordance with the regulations of your local water company.
- For cold fill only models: do not connect to the hot water supply.
- For models with hot fill: the hot water inlet temperature must not exceed 60 °C.
- The washing machine is fitted with transport bolts to prevent any possible damage to the interior during transport. Before using the machine, it is imperative that the transport bolts are removed. After their removal, cover the openings with the enclosed plastic caps.
- After installation, wait a few hours before operating the appliance so that it acclimates to the environmental conditions of the room.

- Make sure that the ventilation openings in the base of your washing machine (if available on your model) are not obstructed by carpet or other material.
- Use only new hoses to connect the appliance to the water supply. Do not reuse old hose-sets.
- The supply water pressure must be in the 0.1-1 MPa range.
- If you install the appliance near a gas or coal stove, provide a heat insulating plate in between (Dimensions: 85 x 57 cm). The side facing the stove must have an aluminum foil cover.
- Do not install the appliance behind a lockable, sliding or hinged door. The door of the appliance must open fully without obstruction.
- Do not repair or replace any part of the appliance unless specifically stated in the user manual. Use only authorized After-Sales Service. Self or non-professional repair may lead to dangerous incident resulting in life or health threatening and/or significant property damage.
- The spare parts for the household washing machines will be available for 10 years after placing the last unit on the market as dictated by the Ecodesign for Sustainable Products Regulation.

1.3 Electrical Warnings

- To disconnect the appliance from the power source:
 - Unplug it (if the plug is accessible), or
 - use a multi-pole switch installed upstream of the socket in accordance with local wiring rules.
- Ensure the appliance is earthed according to national electrical safety standards.
- Do not use extension leads, multiple sockets or adapters. The electrical components must not be accessible to the user after installation. Do not use the appliance when you are wet or barefoot. Do not operate the appliance if the power cord or plug is damaged, if the appliance is not working properly, or if it has been damaged or dropped.
- If the supply cord is damaged, it must be replaced with an identical one by the manufacturer, its service agent or similar.

arly qualified persons in order to avoid possible hazards and the risk of electric shock.

1.4 Cleaning and Maintenance

- Before performing any maintenance, switch off and disconnect the appliance from the power supply.
- Wear protective gloves and safety shoes to avoid injury during maintenance.
- Handle the appliance with two or more people to prevent strain or injury.
- Do not use steam cleaning equipment on the appliance to prevent electric shock.
- Non-professional repairs or maintenance void the warranty and may pose safety risks.

2 Important Instructions for Environment

2.1 Compliance with WEEE Directive

This product complies with EU WEEE Directive (2012/19/EU). This product bears a classification symbol for waste electrical and electronic equipment (WEEE).

This product has been manufactured with high quality parts and materials which can be reused and are suitable for recycling. Do not dispose of the waste product with normal domestic and other wastes at the end of its service life. Take it to the collection center for the recycling of electrical and electronic equipment. Please consult your local authorities to learn about these collection centers.

2.2 Package Information

Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection points designated by the local authorities.

3 Technical Specifications

Supplier's name or commercial brand	WHIRLPOOL
Model name	WWD 128143D SBSA
	457000007200
Washing capacity (cotton) (kg)	12
Drying capacity (cotton) (kg)	8
Maximum spin speed (cycle/min)	1400
Built-In	No
Height (cm)	84,5
Width (cm)	60
Depth (cm)	65
Single Water inlet / Double Water inlet	+ / -
Electrical connection (V/Hz)	230 V / 60Hz
Total current (A)	10
Total power (W)	2000
Main model code	1722
Net weight (±4 kg)	78

The consumption values apply when wireless network connection is turned off.

The defined cybersecurity-related software update support period of the product is the warranty period of the product. After this period, cybersecurity-related software updates are not guaranteed.

4 Installation

Please read the "Safety Instructions" section first!

Your product automatically detects the amount of laundry placed inside when selecting a programme.

While installing the product, before the first use, calibration should be done to ensure that the laundry amount is detected in the most accurate way.

To do this, select the Drum Cleaning* programme and cancel the spin function. Start the programme without laundry. Wait for the programme to finish, which will take about 15 minutes.

*The programme name may vary depending on the model. For the appropriate programme selection, review the programme descriptions section.

- Please contact the nearest Authorised Service for the installation of the product.
- Make sure that the installation and electrical connections of the product are performed by authorised service agent. Manufacturer shall not be held responsible for damages caused by operations performed by unauthorised persons.
- Preparation of the location and electrical, tap water and waste water installations at the place of installation is under customer's responsibility.
- Make sure that the water inlet and discharge hoses as well as the power cable are not folded, pinched or crushed while pushing the product into its place after installation or cleaning procedures.
- Prior to installation, visually check if the product has any defects on it. Do not have the product installed if it is damaged. Damaged products cause risks for your safety.

4.1 Unpacking and Transporting the Product

Unpacking the Product

- Remove the cardboard box or Styrofoam packaging.
- To remove the cardboard or Styrofoam packaging underneath the product, lift the product carefully. If this is not possible, remove it by tilting it slightly to the side or by laying it on its side without damaging the product.
- Open the door and remove the inlet hose and any other accessories inside drum.
- Detach the power cable and drain hose from their fixed positions.
- Remove the transportation safety bolts. (see "Removing the Transportation Safety Bolts")

Transporting the Product

Read the "Transportation Safety" section first!

- Ensure the door and detergent drawer are closed.
- Install the transportation safety bolts carefully without damaging the product's drum. (see "Removing the Transportation Safety Bolts")
- Pack the product with protective packaging to prevent damage during transport.

4.2 Appropriate Installation Location

- Place the product on a hard, rigid and level floor. Do not place it onto a carpet with high pile, or other similar surfaces on top of an underlay, or onto flooring with excessive amounts of springiness e.g., some types of acoustic flooring systems. Placing on an improper floor can cause noise and vibration problems.
- Do not place the product on the power cable.
- Do not install the product at places where temperature may fall below 0 °C. Freezing might damage your product.

- Leave a minimum space of 1 cm between the product and the furniture.
- When installing the appliance on a stepped surface, keep it away from edges.
- Do not place the product on any platform.
- There shall not be any locked, sliding or hinged doors that may prevent the loading door from opening completely in the installation location of this product.
- Do not place or use heat sources such as cooktops, irons, ovens, heaters, etc. on the product.

4.3 Assembly of Bottom Panel Covers

With some models, the base parts of the products are completely closed. These products do not have plugs and covers.

- In order to increase the sound comfort of the product, attach cover A after removing the package foam.

Cover A

Tilt the product back slightly. Rest the tabs of Cover A against the lower panel. Complete the assembly by rotating the cover.

- Cover B and the Cap are optional. If available, attach cover B and the Cap.

Cover B

Rest the tabs of Cover B against the lower panel. Complete the assembly by rotating the cover.

Cap

Insert the cap by pushing it with your finger.

4.4 Removing Transportation Safety Bolts

1. Loosen all transportation safety bolts with an appropriate wrench until they turn freely.
2. Bend the inner part by pressing it at the grip areas and pull the part out.
3. Attach the plastic covers supplied in the User Manual bag into the holes on the rear panel.

WARNING

Remove the transportation safety bolts before operating the product. Otherwise, the product will get damaged.

WARNING

Keep the transportation safety bolts in a safe place to reuse when the product needs to be moved again in the future. Install the transportation safety bolts in reverse order of the disassembly procedure. Never move the product without the transportation safety bolts properly fixed in place.

4.5 Connecting to Water Supply

WARNING

The water pressure required for the operation of the product is between 1-10 bars (0.1-1 MPa). To ensure a smooth operation of the machine, 10 - 80 liters of water shall be supplied in a minute from a fully opened tap. If the water pressure is higher, install a pressure reducing valve.

WARNING

Models with a single water inlet shall not be connected to the hot water tap. In such a case the laundry will get damaged or the product will switch to protection mode and will not operate.

Do not use old or used water inlet hoses on a new product. It may cause water leakage from your product and stain your laundry.

1. Connect the special hose supplied with the product to the water inlet on the product.

WARNING

Make sure that the cold water connection is performed correctly during the installation of the product. Otherwise, your laundry may come out as hot at the end of the washing cycle and thus they may be worn.

2. Tighten all hose nuts by hand. Ensure that all hose connections are fully tight. Never use a tool when tightening the nuts.
3. Open the taps completely after making the hose connection to check for water leaks at the connection points. If any leak occurs, turn off the tap and remove the nut. Check the gasket and tighten the nut carefully again. In order to prevent the water leaks and resultant damages, keep the taps closed when you do not use the product.

4.6 Connecting the Drain Hose to the Drain

1. Attach the end of the drain hose directly to waste water drain, washbasin or bathtub.

Your house will be flooded if the water draining hose is dislocated during water draining. There is also a risk of burning due to the high washing temperatures. In order to prevent such situations and make sure that the product performs water intake and drain processes without any problem, fix the drain hose securely.

2. Connect the hose to a minimum height of 40 cm and a maximum height of 90 cm.
3. If the hose is placed on the floor (or at a maximum height of 40 cm from the floor) and then its height is increased, discharging of water becomes difficult, and laundry may come out very wet from the machine. Thus, follow the heights provided in the figure.
4. To prevent the waste water to go back into the product again and to ensure easy drainage, do not immerse the end

of the hose into the waste water or do not insert it into the drain for more than 15 cm. If it is too long, cut it short.

5. The end of the hose should not be bent, it should not be stepped on and the hose must not be pinched between the drain and the product. Otherwise, water discharge issues may emerge.
6. If the length of the hose is too short, use it by adding an original extension hose. The overall length of the hose shall not be longer than 3.2 m. To prevent water leaks, always secure the connection between the extension hose and the draining hose of the product with a suitable clamp so that it does not come off and cause leaks.

4.7 Adjusting the Feet

NOTICE

In order to ensure that the product operates more silently and vibration-free, it must stand level and balanced on its feet. Adjust the feet to ensure balance. Otherwise, the product may move from its place and cause bumping, noise and vibration problems.

1. To loosen the nuts on the feet, rotate the nuts clockwise using the hand tool.
2. Adjust the feet until the product stands level and stable. To lower the feet, rotate them counterclockwise. To raise the feet, rotate them clockwise.
3. To retighten the nuts, rotate them counterclockwise using the hand tool.

4.8 Electrical Connection

Connect the product to a grounded outlet protected by a 16-amp fuse. Our company shall not be responsible for the damages

that shall be incurred due to using the product without grounding according to local regulations.

- Connection must comply with national regulations.
- The electrical connection cable infrastructure of the product must be adequate and suitable for product requirements. It is recommended to use a Ground Fault Circuit Breaker (GFCI).
- Power cable plug must be within easy reach after installation.
- If the current supply to the fuse or breaker in the house is less than 16 amp, have a qualified electrician install a 16-amp supply.
- Your mains voltage must comply with the voltage specified in the “technical specifications” section.
- Do not make connections via extension cables or multi-plugs. Overheating and burning may occur due to the connecting cable.

Damaged power cables should be replaced by the authorised service in order to prevent possible danger.

4.9 Handling the Product

1. Unplug the product before handling it.
2. Disconnect the water outlet and water main connections. 3 Drain all the water that remains in the product. See Draining Remaining Water and Cleaning the Pump Filter
3. Install the shipping bolts in reverse order of the disassembly procedure. See Removing the Shipping Bolts

Never carry the product without the shipping bolts properly attached! Your product is so heavy that it shall not be carried by one person. Your product shall be carried by two people and more care shall be taken on the stairs as it is a heavy product. If the product falls on you, it may cause injury. The packaging materials are dangerous for children. Keep packaging materials at a safe place away from the reach of children.

5 Preliminary Preparation

Please read the "Safety Instructions" section first

5.1 Sorting the Laundry

- Sort laundry according to type of fabric, colour, and degree of soiling and allowable water temperature.
- Always observe the instructions given on the garment care labels.

5.2 Preparing Laundry for Washing

- Laundry items with metal attachments such as underwiring, belt buckles or metal buttons will damage the product. Remove the metal pieces or wash such clothes by putting them in a laundry bag or pillow case.
- Take out all items in the pockets such as coins, pens and paper clips, and turn pockets inside out and brush. Such objects may damage the product or cause noise problem.
- Put small size clothes such as infant's socks and nylon stockings in a laundry bag or pillow case.
- Place curtains in without compressing them. Remove all curtain accessories such as rings, hooks, and clips to prevent damage to the curtains.
- Fasten zippers, sew loose buttons on securely, and mend rips and tears.
- Wash "Machine washable" or "Hand washable" labelled products only with an appropriate programme. Dry these types

of clothes by hanging them or laying them flat. Do not dry them in the machine.

- Do not wash colours and whites together. New, dark coloured cottons release a lot of dye. Wash them separately.
- Only use paints / colour changing agents and descalers suitable for use in machines. Always observe the instructions on the packaging
- Tough stains must be treated properly before washing. If you are not sure, check with a dry cleaner.
- Wash trousers and delicate laundry turned inside out.
- Laundry that are subjected to materials such as flour, lime dust, milk powder, etc. intensely must be shaken off before placing into the product. Such dusts and powders on the laundry may build up on the inner parts of the product in time and can cause damage.
- Before washing laundry made of angora wool, keep them in the freezer section of the refrigerator for few hours. This will reduce pilling

5.3 Tips for Energy and Water Saving

Following information will help you use the product in an ecological and energy/water-efficient manner.

- Operate the at the maximum load capacity for the programme selected, but do not overload it. See "Programme and consumption table".
- Observe the temperature instructions on the detergent packaging.
- Wash slightly soiled laundry at low temperatures.
- Use faster programmes for small quantities of lightly soiled laundry.
- Do not use prewash or high temperatures for laundry that is not heavily soiled or stained.
- If you plan to dry your laundry in a dryer, select the highest spin speed recommended during washing process.
- Do not use more detergent than the recommended on the detergent packaging.

5.4 Start Up

Before starting to use the product make sure that the preparations described in section "Environmental Instructions" and "Installation". To prepare the product for washing laundry, perform first operation in Drum Cleaning programme. If this programme is not available in your product, apply the method which is described in section "Cleaning the loading door and the drum".

i Use an anti-limescale product suitable for the washing machines. Some water has remained in the product due to the quality control processes in the production. It is not harmful for the product.

5.5 Loading the Laundry

1. Open the loading door.
2. Put the laundry items into the product in a loose manner.

3. Push the loading door to close until you hear a locking sound. Ensure that no items are caught in the door. The loading door is locked while a programme is running. The door lock will open a few minutes after the washing programme has ended. Then you can open the loading door. If the door does not open, apply the solutions provided for "Loading door cannot be opened" error in the Troubleshooting section.

5.6 Correct Load Capacity

The maximum load capacity depends on the type of laundry, the degree of soiling and the desired washing programme.

The product automatically adjusts the water amount according to the weight of the laundry put inside it.

Follow the instructions in "Programme and consumption table".

When the product is overloaded product's washing performance will drop. Moreover, noise and vibration problems may occur.

For a successful drying performance, do not put more laundry in the machine than specified.

Bathrobe: 1200 g
 Bedding: 700 g
 Sheet: 500 g
 Pillow Case: 200 g
 Table Cloth: 250 g
 Negligee/Pyjamas: 200 g
 Lingerie: 100 g
 Shirts: 200 g
 Blouse: 100 g
 Towel: 200 g

The loading door is locked while a programme is running. The door lock will open once the programme is completed. If the inner part of the machine is very hot at the end of the program, the loading door will not open until the temperature drops. If the door does not open, apply the solutions provided for "Loading Door Cannot Be Opened" error in the Troubleshooting section.

WARNING

If the laundry is placed incorrectly, noise and vibration problems may occur in the machine.

5.7 Using Detergent and Softener

WARNING

Read the manufacturer's instructions on the packaging when using detergents, softeners, starch, bleach and decolourants, anti-limescale and follow the dosage information provided. Use a measuring cup, if any.

The detergent drawer comprises of three compartments:

- (1) for prewash - if your model has prewash function available,
- (2) for main washing,
- (3) for softener,
- (☼) a syphon piece in the softener compartment,

(☼) there is a liquid detergent flap for liquid detergent use in the main washing compartment.

Detergent, Softener and Other Cleaning Agents

- Add detergent and softener before starting the washing programme.
- Do not leave the detergent drawer open when the washing programme is on.
- If you are using a programme without prewashing, do not put detergent in the prewash compartment (compartment 1).
- If your model has prewash function available - If you are using a program with prewash, start the product after adding powder detergent to the prewash and main wash compartments (compartments 1 and 2).
- If your model has prewash function available - Do not select a programme with pre-washing if you are using a detergent pod or dispensing ball. Place the detergent pod or the dispensing ball directly among the laundry in the product.
- If you are using a liquid detergent, follow the directions under "Liquid detergent use" and hinge down the liquid detergent flap.
- Do not add washing chemicals (Liquid detergent, Softener, etc.) while the product is during Drying step.

Choosing the Detergent type

Detergent type to be used depends on the washing programme, fabric type and colour.

- Use different detergents for coloured and white laundry.
- Wash your delicate clothes only with special detergents (liquid detergent, wool shampoo, etc.) intended solely for delicate clothes and on suggested programmes.
- When washing dark coloured clothes and quilts, it is recommended to use liquid detergent.
- Wash woollens on suggested programme with special detergent made specifically for woollens.

- Please review the programme descriptions part for suggested programme for different textiles.
- All recommendations about detergents are valid for selectable temperature range of programmes.

Only detergents, softeners and additives suitable for washing machines should be used.
Do not use soap powder.

Adjusting the Detergent Amount

The amount of detergent depends on the amount of laundry, how soiled it is and the water hardness.

- Do not exceed the recommended dosage values on the detergent packaging in order to eliminate excessive foam and poor rinsing problems, to save money and protect the environment.
- Use less detergent for lightly soiled or small amount of laundry.

Using Softeners

Put the softener in the softener compartment of the detergent drawer.

- Do not exceed the (>max<>) level sign in the softener compartment.
- If the softener is thick, dilute with water before placing in the softener compartment.

WARNING

Do not use liquid detergents or other materials with cleaning properties unless they are intended for use in washing machines for softening the laundry.

Using Liquid Detergents

If the Product Has a Liquid Detergent Flap

- Hinge down the liquid detergent flap when you want to use liquid detergents. The flap will serve as a barrier for liquid detergent.
- Clean with water at its place or by removing from its place when it is necessary. Do not forget to place the flap in the main washing compartment (compartment 2) after cleaning.

- The flap should be up if you will use a powder detergent.

Use of Gel and Tablet Detergents

- If the detergent is fluid and there is no liquid detergent compartment in your product, place the gel detergent in the main washing detergent compartment in first water intake. If your product has a liquid detergent compartment, fill the compartment with detergent before starting the programme.
- If the gel detergent is not fluid or is in a capsule liquid tablet, place directly inside the drum before washing.
- Put the tablet detergent in the main washing compartment (compartment 2) or directly inside the drum before washing.
- Tablet detergents may leave residue in the detergent compartment. If you face such residues, place the tablet detergent among the laundry in the next washes in a way that it will be at the bottom side of the drum.
- Use tablet or gel detergent without selecting the pre-wash function.
- Do not forget to remove elements such as plastic detergent compartment from the drum before drying.

Using Starch

- Put in the liquid starch, powder starch or fabric dye in the softener compartment.
- Do not use softener and starch in the same washing programme simultaneously.
- Wipe the inside of the product with a damp and clean cloth after using starch.

Using Anti-Limescale

- When necessary, only use anti-limescale produced for washing machines.

Using Bleach and Decolourants

- Select a programme with pre-washing and add bleach at the start of pre-washing. Do not put detergent in the pre-wash compartment. As an alternative application, select a programme with additional rinsing and add the bleach while the product is receiving water to the detergent compartment in the first rinsing step.
- Do not mix and use bleach and detergent together.
- As bleach may cause skin irritation use only small amounts (1/2 tea cups - approximately 50 ml and rinse the laundry well.
- Do not pour bleach directly onto the laundry.
- Do not use bleach for coloured clothes.
- Select a programme with low temperature washing while using oxygen-based decolourants.
- Oxygen-based decolourants can be used together with detergents. However, if it does not have the same viscosity as the detergent, first place the detergent in compartment no. "2" in the detergent drawer and wait for the product to rinse away the detergent during water intake. Add the decolourant to the same compartment while the product continues taking in water.

5.8 Tips for Efficient Washing

	Clothes			
	Light Colours and Whites	Colours	Black/Dark Colours	Delicates/ Wool-lens/Silks
	(Recommended temperature range based on soil level: 40-90 °C)	(Recommended temperature range based on soil level: cool -40 °C)	(Recommended temperature range based on soil level: cool -40 °C)	(Recommended temperature range based on soil level: cool -30 °C)

Dry these laundry by hanging them or laying them flat.	Not Recommended! It is not suitable to dry bulky laundry in the washing machine. Dry these laundry by hanging them or laying them flat.

5.10 Displayed Programme Duration

You can view the programme duration on the display of your product while selecting a programme. Depending on the amount of laundry you have loaded into your product, foaming, unbalanced load conditions, fluctua-

tions in power supply, water pressure and programme settings, the programme duration is automatically adjusted while the programme is running.

SPECIAL CASE: At programme start of Cottons and Cotton Eco programmes, display shows the duration of half load. It is the most common use case. After programme

starts, in 20-25 minutes actual load is detected by the product. And if the detected load is higher than half load; washing programme will be adjusted accordingly and

programme duration increased automatically. You can follow this change on the display.

6 Operating the Product

Please read the "Safety Instructions" section first!

6.1 Control Panel

- | | |
|---------------------------------|----------------------------------|
| 1 Programme Selection Button | 2 Temperature Level Lights |
| 3 Spin Level Indicator Lights | 4 Display |
| 5 Start / Pause Button | 6 Remote Control Button |

| 15 No Spin Indicator | 16 Rinse Hold Indicator |
| 17 Cold Water Indicator | |

The visuals used for machine description in this section are schematic and may not match exactly with the features of your machine.

3. Turn on the tap completely.
4. Place the laundry inside the machine.
5. Put detergent and softener.

6.3 Preparing the Machine

1. Check if the hoses are connected tightly.
2. Plug in your machine.

6.4 Selection of Washing Program

1. Determine the programme suitable for the type, quantity and soiling level of the laundry in accordance with "Programme and consumption table".

Programmes are limited to the highest spin speed appropriate for that particular type of fabric. When selecting a programme, always consider the type of fabric, colour, soiling level and permissible water temperature.

2. Select the desired programme with the Programme Selection knob.

6.5 Washing Programmes

Use the following main programmes depending on the type of fabric.

After selecting the appropriate washing program, by pressing the Drying button before starting the program, you can set your machine to switch to the drying step (automatically or scheduled) at the end of the washing program, without any pauses/interruptions. Each time you press the button, the step in which the drying process will take place is shown in the row of information and the related symbol lights up. You can see when the programme will finish on the display of the machine, according to the drying selections you will add to the washing programmes. If you want, by keeping pressing the button you can dry for the maximum time allowed.

You can take a glance at the programmes for which you can select the drying function in the Programme and Consumption tables.

Symbols shown on the display are schematic and may not match with the product one-to-one.

If you do not want to perform drying process after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light turns off.

When washing and drying using the Drying function of your machine, load a maximum of 8 kilograms of laundry into the machine. If you load more laundry than the capacity of the machine, your laundry will not dry and the machine will run longer and consume more energy.

NOTICE

The drying function cannot be selected for the washing programme for woollen clothes.

• Cottons Eco

Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), periods in programme stages may automatically get shorter. In this case, energy and water consumption will decrease.

• Cotton

You can wash your durable cotton laundry (sheets, bedlinen, towels, bathrobes, underwear etc.) in this programme. When the quick wash function button is pressed, programme duration becomes notably shorter but effective washing performance is ensured with intense washing movements. If the quick wash function is not selected, effective washing and rinsing performance is ensured for your heavily soiled laundry.

• Synthetics

Use this programme to wash your clothes such as t-shirts, blouses, synthetic/cotton-blend fabrics etc. The quick wash function

shortens the programme duration significantly and ensures effective washing performance for lightly-soiled laundry. The quick wash function is not suitable for heavily-soiled laundry.

If your product does not have a specific curtains programme, you can use this programme. Wash your curtains at 40 °C maximum and with a spin speed up to 800 rpm.

- **Delicates/Wool**

Use to wash your woollen/delicate laundry. Select the appropriate temperature complying with the tag of your clothes. Your laundry will be washed with a very gentle washing action in order not to damage the clothes.

- **Spin+Drain**

You can use this program to remove the water on the garment/inside the product.

- **Rinse & Spin**

Use when you want to rinse or starch separately.

- **Curtain**

You can use this programme to wash your tulles and curtains. As their meshed texture causes excessive foaming, put little amount of detergent into the main washing compartment. Thanks to the special spin profile of the programme, tulles and curtains crease less. Do not load your curtains above the specified capacity in order not to damage them.

It is recommended to use special detergents produced for curtains in the powder detergent compartment in this programme.

- **Shirt**

This programme is used to wash the shirts made from cotton, synthetic and synthetic blended fabrics altogether. It reduces wrinkles. Steam is applied at the end of the programme to help the wrinkle reducing function. The special spin profile and steam applied at the end of the programme reduce the wrinkles on your shirts. When the quick wash function is selected, the Pre-treatment algorithm is executed.

- Apply the pre-treatment chemical on your garments directly or add it together with the detergent in the powder detergent compartment. Thus, you can obtain the same performance as you obtain with normal washing in a much shorter period of time. Usage life of your shirts increases. Do not use pre-wash detergent if you are planning to use delay function of your product. Prewash detergent may pour out on your clothes and cause stains.

** It is recommended to operate the cycle with no more than 6 shirts to minimize wrinkles in your shirts using this cycle. When washing more than 6 shirts, there may be differences on the wrinkle levels and humidity on shirts at the end of cycle.

** When you select the drying function with the Shirts programme, do not load your product with more than laundry than recommended below: Otherwise wrinkles or humidity problems can occur on your shirts.

Maximum recommended shirt number:

If the product depth is 50 cm, 4 shirts

If the product depth is 54 - 60 cm, 5 shirts

You can find the depth information of your product in the Technical Specification table in your user manual.

- **Rapid 28'**

Use this programme to wash your lightly soiled or unspotted cotton clothes in a short time but not for towels or heavy cottons. The programme duration can be reduced down to 14 minutes when the quick wash function is selected. When the quick wash function is selected, maximum 2 (two) kg of laundry must be washed.

- **Drum Clean**

Regularly clean (once every 1 to 2 months) the drum for ensuring the required hygiene. Steam is applied before the programme to soften the residues in the drum. Turn on the programme when the product is completely empty. For more effective results,

place powder anti-limescale (drum cleaning materials) suitable for washing machines inside the detergent compartment no. "2". There is a drying step after drum cleaning in this programme for the inside of the drum to dry.

This is not a washing programme. This is a maintenance programme. Do not turn this programme on when there is something inside the product. When you attempt to operate, the product automatically senses that there is load inside, and may quit or resume the programme as per the model of your product. An effective cleaning is not achieved if the programme is resumed.

• Mix

Use to wash your cotton and synthetic laundry items together without sorting them.

• Underwear

You can use this programme to wash delicate garments that are suitable for hand wash and delicate women's underwear. Small amount of garments must be washed in a washing net. Hooks, buttons etc. must be done up and zips must be zipped up.

• Outdoor/Sports

You can use this programme to wash sports and outdoors garments that contain cotton/synthetics mix and waterproof fabric such as Gore-Tex etc. It makes sure your garments are washed gently thanks to special rotating movements.

• ColdWash

Use to wash your medium dirty and durable cotton/synthetic laundry. Thanks to the washing algorithm specially developed for the program, effective washing is ensured without exposing the laundry to high temperatures.

• Remote Cycle

This is a special programme that allows you to download different programmes when you want to. At the start, there is a

programme you can see with the HomeWhiz application as default. However, you can use the HomeWhiz application to select a programme from the predetermined programme set, and then change and use it.

If you want to use HomeWhiz feature and Remote Control function, you must select Downloaded Programme. Detailed information can be found in HomeWhiz Feature and Remote Control Function.

6.6 Temperature Selection

Whenever a new programme is selected, the recommended temperature for the programme appears on the temperature indicator. It is possible that the recommended temperature value is not the maximum temperature that can be selected for the current programme.

Press the Temperature Adjustment button to change the temperature. Temperature decreases gradually.

Temperature Adjustment button only works backwards. For example, if you want to select 60°C while 40°C is written on the display, you need to press the button several times until you reach 60°C, going backwards from 40°C.

If you go to Cold Wash option and press Temperature Adjustment button again, the recommended maximum temperature for the selected programme will be displayed. Press the Temperature Adjustment button again to decrease the temperature.

Finally, the Cold light that indicates cold washing illuminates on the display.

You can also change the temperature after the washing starts. You can also change the desired temperature after the washing programme starts. However, you need to do this before the heating phase starts.

6.7 Spin Speed Selection

Whenever a new programme is selected, the recommended spin speed of the selected programme is displayed on the Spin Speed indicator. It is possible that the recommended spin speed value is not the maximum spin speed that can be selected for the current programme.

Press the Spin Speed Adjustment button to change the spin speed. Spin speed decreases gradually.

Then, depending on the model of the product, "Rinse Hold"  and "No Spin"  options appear on the display.

 Spin Speed Adjustment button only works backwards. For example, if you want to select 1000 rpm while 800 rpm (cycle/min) is written on the display, you need to press the button several times until you reach 1000 rpm, going backwards from 800 rpm.

If you are not going to unload your laundry immediately after the programme completes, you can use Rinse Hold function in order to prevent your laundry from getting wrinkled when there is no water in the machine.

This function holds the laundry in the final rinsing water. If you want to spin your laundry after the Rinse Hold function:

1. Adjust the Spin Speed.

2. Press Start/Pause button. The programme will resume. Machine drains the water and spins the laundry.

If you want to drain the water at the end of the programme without spinning, use No Spin function.

 No change can be made in programmes where spin speed adjustment is not allowed.

You can change the spin speed after the washing starts if the washing steps allow it. Changes cannot be made if the steps do not allow it.

Auxiliary function selection for drying:

When you select a new washing program, press the Auxiliary Function Selection button to set the drying option suitable for this program.

 In programmes that do not allow the drying setting, when the Drying auxiliary function button is pressed, the drying light will not change and a warning noise will be heard. For only drying programmes, set the appropriate drying option by pressing the Auxiliary Function Selection button.

6.8 Drying Programmes

 **WARNING** The machine automatically cleans the lint that from the laundry during drying programme. The machine uses water during drying. For this reason, the water tap of the machine should also be open during drying programmes. When you select a new washing program, press the Auxiliary Function Selection button to set the drying option suitable for this program.

In drying programmes, there is a spinning step. Your machine performs this process in order to shorten the drying duration. When the drying programme is selected, the spin speed setting is in the range of Maximum spin speed.

In programmes that do not allow the drying setting, when the Drying auxiliary function button is pressed, the drying light will not change and a warning noise will be heard. For only drying programmes, set the appropriate drying option by pressing the Auxiliary Function Selection button.

 In case of water outage, washing and drying cannot be performed.

• Synthetic Dry

Use this programme to dry synthetic laundry with a dry weight of up to 5 kilograms. You can only dry in this programme.

 For the dry weight of the laundry, see Correct Load Capacity

• Cotton Dry

Use this programme to dry cotton laundry with a dry weight of up to 8 kilograms. You can only dry in this programme.

 When you will dry laundry consisting of towels and bathrobes only, load a maximum of 5 kilograms of laundry.
For the dry weight of the laundry, see Correct Load Capacity

6.9 Washing and Drying Programmes

• Wash & Dry 8kg

Use this programme to dry up to 8 kg of cotton laundry right after the washing programme, without making any other selections.

 External Drying auxiliary function cannot be selected while this programme is selected.

In the 8 kg Washing and 8 kg Drying programme, it is recommended to fill the machine to the level shown in the figure above for ideal drying conditions (you can see the level arrow when you open the loading door).

• Wash & Dry 59'

Use this programme to wash 0.5 kg of laundry (2 shirts) in 40 minutes or to wash 1 kg of laundry (5 shirts) in 60 minutes.

 Clean and Wear programme is designed to quickly wash and dry daily clothes that have been worn for a short time and are not heavily contaminated. This programme is suitable for fine-textured and quick-drying laundry (shirts, t-shirts). For thick textured laundry that takes longer to dry, other drying options or programmes should be used.

• Steam Refresh

Hygienic washing with hot air (programme duration 28 min.)

The hygienic ventilation programme ensures that the temperature of the laundry is kept at relatively high temperatures with a precise heating method and hygienic cleaning is performed via air.

Use this programme for fast hygienic cleaning of your cotton or synthetic dry clothes with hot air.

Hygienic Ventilation programme does not use water. Use this programme for clothes you want to clean by ventilation.

NOTE: Do not put chemicals such as detergents, bleach, stain remover, etc. in the detergent drawer in the hygienic ventilation programme. No pre-treatment to laundry is required before turning on the programme.

6.10 Programme and Consumption Table

For washing:

Program						Auxiliary functions						Temperature °C
	Temperature °C	Maximum load (kg)	Water consumption (lt)	Energy consumption (kWh)	Max RPM	Fresh Care	Fast+	Extra Rinse	Steam	Drying	Water Saving	
Cotton	90	12	120	3,00	1400	*	*	*	*	*	*	Cold - 90
	60	12	120	2,35	1400	*	*	*	*	*	*	Cold - 90
	40	12	110	1,40	1400	*	*	*	*	*	*	Cold - 90
Cottons Eco	60**	12	45,0	0,654	1400					*		Cold - 60
	60**	6	52,0	0,615	1400					*		Cold - 60
	40**	6	50,0	0,550	1400					*		Cold - 60

Curtain	40	2	98	0,9	800			*				Cold - 40

• : Selectable.

* : Automatically selected, cannot be cancelled.

** : Energy label programme

***** : These programmes can be used with the HomeWhiz application. Energy consumption may increase due to connection.

- : See the programme description for maximum load.

Please read Installation section of the manual before first use.

The auxiliary functions in the table may vary according to the model of your product.

Water and energy consumption may vary subject to the changes in water pressure, water hardness and temperature, ambient temperature, type and amount of laundry, selection of auxiliary functions and spin speed, and changes in electric voltage.

Selection patterns for auxiliary functions can be changed by the manufacturer company. New selection patterns can be added or removed.

The spin speed of your product may vary according to the programme; this spin speed cannot exceed the max. spin speed of your product.

The amount of noise and humidity varies according to the spin speed; when the higher spin speed is selected during the spinning phase, the laundry contains less moisture but higher noise occurs at the end of the programme.

You can see the washing duration on the display of your product while selecting a programme. Depending on the amount of laundry you have loaded into your product, there may be a difference of 1-1.5 hours between the duration shown on the display and the actual duration of the wash cycle. Duration will be automatically updated soon after the washing starts.

Always select the lowest appropriate temperature. The most efficient programmes in terms of energy consumption are generally those that wash at low temperatures for a long time.

The spin speed information given at the program table indicates spin speed option shown on the control panel.

For drying:

Program	°C	Maximum load (kg)	Water consumption (lt)	Energy consumption (kWh)	Max RPM	Auxiliary functions						Drying level				
						Steam	Fast+	Extra Rinse	Water Saving	Fresh Care	Drying	Extra dry	Cupboard dry	Iron drying	Timed drying - minutes	Temperature Selection °C

Steam Refresh	-	2	1	0,50	-						*					-

Consumption values (EN)										
	Temperature Selection °C	Capacity (kg)	Main wash cycle (quantity)	Water consumption in main wash (liters)	Main wash duration (minutes)	Rinse cycle (quantity)	Total water consumption in rinse cycles (liters)	Total duration of rinse cycles (minutes)	Spin cycle (quantity)	Total duration of spin cycles (minutes)
Cottons Eco	60	12	1	20,00	216	2	28,0	13	3	27
	60	6	1	17,00	125	2	35,0	18	3	22
	40	6	1	17,00	125	2	35,0	20	3	22

6.11 Auxiliary Function Selection

Select the desired auxiliary functions before starting the programme. Whenever a programme is selected, icons of the auxiliary function symbol that is selected together with it illuminate.

When an auxiliary function button that cannot be selected with the current programme is pressed, the product will make a warning sound. Some functions cannot be selected together. If a second auxiliary function conflicting with the first one is selected before starting the machine, the function selected first will be cancelled and the second auxiliary function selection will remain active. For example, if you want to select Quick Wash after you have selected the Additional Water, Additional Water will be cancelled and Quick Wash will remain active.

An auxiliary function that is not compatible with the programme cannot be selected. (See "Programme and consumption table") Some programmes have auxiliary functions that must be operated simultaneously. Those functions cannot be cancelled. The frame of the auxiliary function will not be illuminated, only inner area will be illuminated.

If the selected wetness level (Iron Dry, Cupboard Dry, Cupboard Extra Dry) cannot be reached at the end of the drying programme, your machine automatically extends the programme duration. The programme takes longer.

If Timed Drying is selected, the programme finishes at the end of the drying duration even if the laundry has not dried.

During the drying programme, if the selected wetness level (Iron Dry, Cupboard Dry, Cupboard Extra Dry) is reached or extra dryness is detected in the timed drying options, the programme will take a shorter time. The time shortening is shown on the display.

6.11.1 Auxiliary Functions

• Fast+

After selecting a programme, you can press the Quick Wash setting button to shorten the programme duration. For some programmes, the duration can shorten by over 50%. Despite this, a good washing performance is achieved thanks to the changed algorithm.

While it differs with each programme, when you press the Quick Wash button once, the programme duration will drop to a certain level. If you press the same button for the second time, it will drop to the minimum duration.

Do not use Quick Wash adjustment button when washing heavily soiled laundry for a better washing performance.

Use the Quick Wash button for Mildly and Lightly soiled laundry and shorten the programme duration.

• Water Mode

This auxiliary function key allows you to select the additional functions of Water Saving, Pre-Wash, and Extra Rinse or Extra water depending on the model of your ma-

chine. You can find detailed information about the selection in the description of the respective auxiliary function.

• Water Saving

Select this function by pressing the Water Mode auxiliary function key once for all programs indicated as selectable in the Program and Consumption table.

This function is intended for lightly soiled laundry that requires only a small amount of detergent (see "Tips for Correct Washing"). It enables environmentally friendly washing by reducing the amount of water used, without compromising on washing performance.

• Extra Rinse

You can use this function for all programs indicated as selectable in the Program and Consumption table. Select this function by pressing the Water Mode key twice for programs where the additional Water Saving function can be selected, or by pressing the Water Mode key once for programs where the additional Water Saving function cannot be selected.

This function enables the product to make additional rinsing in addition to the one already made after the main wash. Thus, the risk for sensitive skins (babies, allergic skins, etc.) to be effected by the minimal detergent remnants on the laundry can be reduced.

• Remote Control

You can use this auxiliary function button to connect your product to smart devices. For detailed information, see HomeWhiz Feature and Remote Control Function.

• Customized Program

This auxiliary function can only be used for Cotton and Synthetic programmes together with the HomeWhiz application. If this function is activated under the HomeWhiz "Personalize" menu, you can add up to five additional rinsing steps to the program. You can select and use some auxiliary functions even though they are not found on

your product. You can increase and decrease the time of the Cotton and Synthetic programmes within a safe range.

When the Specialised Programme auxiliary function is selected, the washing performance and energy consumption will be different than the declared value.

• **Drying**

This function allows the laundry to dry after washing. Check in the programme table with which programmes this auxiliary function can be selected.

6.11.2 Functions/Programmes Selected by Pressing the Function Keys for 3 Seconds

• **Fresh Care**

This function is selected when the relevant Auxiliary function button is pressed and held for 3 seconds and the programme follow-up light for the relevant step turns on. When selected, it aerates the laundry for up to 8 hours at the end of the programme to prevent creasing. You can cancel the programme and take your laundry out at any time during the 8-hour duration. Press the function selection key or the machine on/off key to cancel the function. The programme follow-up light will remain on until the function is cancelled or the step is complete. If the function is not cancelled, it will be active in the subsequent washing cycles as well.

• **Steam**

This function can be selected by pressing and holding the related auxiliary function button for 3 seconds.

This function helps to reduce the creases of your cotton, synthetic and mixed clothes, shorten the ironing time and remove the dirt by softening.

*Your laundry may be hotter at the end of the washing cycle when the steam function is applied at the end of the programme. This is an expected condition within the operating conditions of the programme.

• **Child Lock**

Use Child Lock function to prevent children from tampering with the product. Thus you can avoid any changes in a running programme.

You can switch on and off the product with On / Off button when the Child Lock is active. When you switch on the product again, programme will resume from where it has stopped.

When the Child Lock is enabled, an audio warning will be given if the buttons are pressed. Audio warning will be cancelled if the buttons are pressed five times consecutively.

To activate the child lock:

Press and hold Drying Level Adjustment button for 3 seconds. After the countdown as "CL 3-2-1" on the display is over, "CL On" (Child Lock On) symbol appears on the display. You may release the Drying Level Adjustment button when this symbol is displayed.

To deactivate the child lock:

Press and hold Drying Level Adjustment button for 3 seconds. After the countdown "CL 3-2-1" on the display is over, "CL Off" (Child Lock Off) symbol appears on the display.

6.12 Drying Steps

Iron Dry

Drying is performed until the Iron Dry step is reached at the drying level.

Cupboard Dry

Drying is performed until the Cupboard Dry step is reached at the drying level.

Extra Dry

Drying is performed until the Cupboard Extra Dry step is reached at the drying level.

 The dryness level may vary depending on the laundry mixing and material type as well as amount and wetness level.

Clothes containing lace, tulle, stone, beads, sequins, wires etc. and laundry with high silk content should not be dried in the machine.

Timed Drying – minute

To achieve the desired dryness level at a low temperature, you can choose from drying durations of 30, 90 and 150 minutes.

When drying a small amount of laundry (maximum 2 items), the timed drying steps in Cotton or Synthetic dry programmes should be selected.

If the laundry is not at the desired dryness level at the end of the drying programme, timed drying can be selected to finish the process.

When this function is selected, the machine performs drying for the set time regardless of the drying level.

6.13 End Time

Time display

When the end time function is selected, the remaining time until the programme starts is shown in hours such as 1h, 2h, and the remaining time to complete the programme after your programme starts is shown in hours and minutes as in the 01:30 example.

 Programme duration may differ from the values in section "Programme and consumption table" depending on the water pressure, water hardness and temperature, ambient temperature, amount and the type of laundry, auxiliary functions selected and the changes at the mains voltage.

 After a certain period of time after the end time function is activated, the product goes into standby mode and some LEDs on the screen turn off. If there is any user input, the LEDs will turn on again.

With the End Time function, the end time of the programme may be set up to 24 hours. After pressing End Time button, the programme's estimated ending time is displayed. If the End Time is set, End Time indicator is illuminated.

In order for the End Time function to be activated and the programme is completed at the end of the specified time, you must press Start/Pause button after adjusting the time.

If you want to cancel the End Time function, turn the product off and on by turning the program selection knob to the On/Off position.

 When you have activated the End Time function, do not add liquid detergent in the powder detergent compartment no 2. There is the risk of staining of the clothes

1. Open the loading door, place the laundry and put detergent, etc.
2. Select the washing programme, temperature, spin speed and, if required, the auxiliary functions.
3. Set the End Time of your choice by pressing the End Time button. End Time indicator lights.

4. Press Start/Pause button. Time count-down starts.

Additional laundry can be added into the product during the End Time countdown. At the end of the countdown, End Time indicator turns off, washing cycle starts and the time of the selected programme appears on the display.

The door remains locked during the End Time countdown. To unlock the door, you need to put the product in pause mode by pressing the programme start/pause button. At the end of the countdown, End Time indicator turns off, washing cycle starts and the duration of the selected programme appears on the display.

When the End Time selection is completed, the time appearing on the display consists of end time plus the duration of the selected programme.

6.14 Starting the Program

1. Start the programme by pressing the Start/Pause button for about 1 second.
2. The flashing light of Start/Pause button starts to illuminate steadily, indicating that the programme has started.
3. Loading door is locked. "Locking Door" expression appears on the display while the door is being locked.

6.15 Loading Door Lock

There is a locking system on the loading door of the machine that prevents opening of the loading door in cases when the water level is unsuitable.

"Door Locked" symbol appears on the display when the loading door is locked.

If the Remote Control Function is selected, the door will be locked. In order to open the door you must deactivate Remote Start Function by either pressing the Remote Start button or changing the programme position.

Opening the loading door in case of power failure:

In case of a power failure, you can use the loading door emergency handle under the pump filter lid to manually open the loading door.

Before opening the loading door, make sure that there is no water in the product to avoid flooding.

1. Turn off and unplug the product.
2. Open the pump filter lid.

3. Pull down the loading door emergency handle with a tool and release. Then open the loading door.
4. If the loading door does not open then repeat the previous step.

6.16 Changing Selections After Programme Starts

Adding laundry after the programme has started :

If the water level in the machine is suitable when you press Start/Pause button, the door lock will be deactivated and the door will open, allowing you to add garments. The door lock icon on the display goes off when the door lock is deactivated. After adding garments, close the door and press Start/Pause button once again to resume the washing cycle.

If the water level in the machine is not suitable when you press Start/Pause button, the door lock cannot be deactivated and the door lock icon on the display remains on.

 If the temperature of the water inside the machine is above 50°C, you cannot deactivate the door lock for safety reasons, even if the water level is suitable.

Switching the machine to pause mode:

Press the Start/Pause button for 1 second to switch the machine to pause mode. Pause symbol will flash on the display.

Changing the programme selection after programme has started:

The programme change is allowed when the current programme is running unless the Child Lock is enabled. This action will cancel the current programme.

 The selected programme starts anew.

Changing the auxiliary function, speed and temperature:

Depending on the step the programme has reached, you can cancel or activate the auxiliary functions. See "Auxiliary function selection"

You can also change the speed and temperature settings. See "Spin speed selection" and "Temperature selection".

 The loading door will not open if the water temperature in the machine is high or the water level is above the loading door baseline.

6.17 Cancelling the Programme

The programme is cancelled when programme selection knob is turned to a different programme or product is turned off and on again using the programme selection knob.

If you turn the programme selection knob when the Child Lock is enabled, the programme will not be cancelled. You should cancel the Child Lock first.

If you want to open the loading door after you have cancelled the programme but it is not possible to open the loading door since the water level in the product is above the loading door baseline, then turn the Programme Selection knob to Pump+Spin programme and drain the water in the product.

6.18 End of Programme

End symbol appears on the display when the programme is completed.

If you do not press any button for 10 minutes, the product will switch to OFF mode. Display and all indicators are turned off.

Completed programme steps will be displayed if you press any button.

6.19 Standby Mode

Your machine has the "Standby Mode" feature.

After turning the machine on with the On/Off button, if no programme is started or no other action is taken during the selection phase, or if nothing is performed within approximately 2 minutes after the selected programme is over, the machine automatically switches to energy saving mode. Furthermore, if your product has a display that shows the programme time, this display is completely turned off. If you turn the programme selection button or touch any button, the lights are illuminated and the screen will turn on again. The choices you make when exiting the energy saving state may change.

Check your selections' accuracy before starting the programme. Adjust your settings again if necessary. This is not an error.

6.20 HomeWhiz Feature and Remote Control Function

You can check your washing machine from smart devices and get information about the status of your machine thanks to the HomeWhiz function. You can carry out many operations on your machine from your smart device by using the HomeWhiz application. Moreover, you can use certain properties only with the HomeWhiz Function.

You must download the HomeWhiz application from the app store of your smart device to use the Wifi feature of your machine.

To use the app, make sure your smart device is connected to the internet.

If you are using the app for the first time, complete user account registration by following the directions on the app. You can use all HomeWhiz featured products in your home through this account after registration is complete.

The Bluetooth of your smart device should be on and your device should be connected to the internet during setup. Your smart device should be close to the washing machine. After the setup, the Bluetooth can be turned off or your smart device does not need to be close to the washing machine. You may use your product provided that your smart device is connected to internet. You can tap the "Devices" tab in the application to view appliances paired with your account. You may perform the user pairing operation of these products on this page. After the app is setup, with the HomeWhiz Function, your washing machine can give you instant status notifications via your smart device.

Your washing machine will send you notifications over HomeWhiz application in the following cases:

- At the end of the programme,
- When the door of the washing machine is opened,
- In case of water cut warning,
- In case of security warning,

To utilize the HomeWhiz feature, ensure that the HomeWhiz app is installed on your smart device and that your washing machine is connected to your home Wi-Fi network. When your washing machine is not connected to the network, it operates like a machine without HomeWhiz function.

Your product shall run with a connection to the wireless network in your home network. The controls made by means of the application will be enabled through this network. Therefore, the wireless signal strength near the machine's location must be adequate.

Operates at HomeWhiz 2.4 GHz frequency band.

Please visit www.homewhiz.com link to learn which Android and IOS versions are supported by HomeWhiz application.

All safety measures described in the "**GENERAL SAFETY INSTRUCTIONS**" titled section of the user manual are also valid for remote operation with HomeWhiz function.

6.20.1 HomeWhiz Setup

A connection should be set between your product and the app in order for the app to function. Follow the steps below to establish this connection.

1. If you are adding a device for the first time, touch "Appliances" tab on the HomeWhiz Application. Select "ADD APPLIANCE" (touch here for setting up a new appliance) button in the upper right corner. Perform the setup by following both the steps below and the steps in the HomeWhiz Application.
2. To start the setup, make sure that your machine is turned off. Press and hold the Temperature button and the Remote Control Function button simultaneously for 3 seconds to switch your machine to HomeWhiz setup mode.

3. When in HomeWhiz setup mode, an animation appears on the screen and the Wireless Connection icon flashes until your machine connects to the internet. Only programme knob will be active in this mode. Other buttons will be inactive.

4. Follow the instructions on the display of HomeWhiz application.
5. Wait until the installation is complete. When setup is complete, give your washing machine a name. Now, you see the product you have added in the HomeWhiz Application.

Your washing machine will automatically turn off if you cannot realize the setup successfully within 5 minutes. In this case, you have to start the setup process all over again. If the problem continues, please contact the Authorised Service.

You can use your washing machine with more than one smart device. To do this, download the HomeWhiz app on the other smart device as well. When you launch the app, you will need to log in with the account you previously created and paired with your washing machine. Otherwise, please read "Setting up a washing machine that is connected to someone else's account".

HomeWhiz Application may require you to type the product number shown on the product label. You can find the product label inside the appliance door. The product number is located on this label.

6.20.2 Setting up a Washing Machine Connected to Someone Else's Account

If the washing machine you want to use was previously introduced to the system with someone else's account, you must establish a new connection between your HomeWhiz Application and the product.

1. Download HomeWhiz Application on the new smart device you want to use.
2. Create a new account and log in to this account on the HomeWhiz app.
3. Follow the steps described in HomeWhiz Setup Setup and proceed with the setup procedure.

Given that your product's HomeWhiz Feature and Remote Control functionality operate via either Bluetooth or Wi-Fi technology, depending on your product model, it's important to note that only one HomeWhiz application can control your product at any given moment.

6.20.3 Deleting the HomeWhiz Account Match

Follow the following steps in order to delete a washing machine previously matched with someone else's account.

1. Turn on your machine using the program button.
2. When your machine is running, push and hold the Remote Control Function button and End Time Setting buttons for 5 seconds.

3. You will hear warning sound from the product to notify your request after the countdown on the screen. Deleting the match will take a few seconds.

After this operation, you cannot use the HomeWhiz function of your washing machine until you do another setup.

Your product does not need to be connected to the internet in order to delete an account matching. Your request will be received. This matching will be automatically deleted when the product is first connected to the internet.

6.20.4 Remote Control Function and Its Use

After HomeWhiz setup, Wireless Connection will automatically turn on. To activate or deactivate the wireless connection, please see "Wireless Connection".

If you turn off and on your machine while Wireless Connection is active, it will automatically reconnect. In cases of changing your network password or turning the modem off, the wireless connection will automatically turn off. For this reason, you will need to turn on the Wireless Connection again if you want to use the Remote Control function.

You can check the Wireless Connection symbol on the display to track your connection status. If the symbol is continuously on, it means you have internet connection. If the symbol is blinking, it means the machine is trying to connect. If the symbol is off, you have no connection.

When the wireless connection is on in your product, Remote Control function will be selectable.

If the Remote Control function cannot be selected, check the connection status. If the connection cannot be established, repeat the initial setup settings on the appliance.

If you want to control your washing machine remotely, you must activate the remote control function by pressing the Remote Control button on the control panel. Once access is established to the product, you will see a screen similar to the one below.

When the Remote Control is enabled, you can only manage the machine, turn it off and follow the status through your washing machine. And all functions except child lock can be managed through the application.

You can follow whether the Remote Control function is on or off through the function indicator on the display.

If the Remote Control function is Off, all the operations are handled on the washing machine and only status follow-up is allowed on the application.

Remote Control function may not be activated if the remote connection is off or the product door is on.

Once activated, the remote control function on your washing machine remains active unless specific circumstances apply. This feature enables you to control your ma-

chine via the internet, regardless of whether the machine is turned on or off, and regardless of your location.

In certain cases, it deactivates itself for safety reasons:

- When your washing machine undergoes a power interruption.
- When the door of the washing machine is opened,.
- When programme knob is turned and a different programme selected or appliance is turned off.

6.20.5 Troubleshooting

Do the following if you have a problem with controlling or connection. Observe whether the problem persists or not after the action you have performed.

1. Check whether your smart device is connected to the relevant home network.
2. Restart the product application.
3. Turn Bluetooth or Wi-Fi off and on via the control panel, depending on the model of your product.
4. If the connection cannot be established with the above processes, repeat the initial set-up settings on the washing machine.

If the problem persists, consult an Authorised Service Agent.

6.20.6 HomeWhiz Consumption Values Display

Your product has a consumption management feature. The capabilities of this feature may vary between different product models, encompassing functionalities such as energy consumption monitoring, water usage tracking, and more. For this feature to work, your product must be added to HomeWhiz and connected to the internet. With this feature, you can track your smart product's consumption data over various time intervals and benefit from tailored suggestions aimed at reducing consumption.

i Please note that the consumption data displayed in the HomeWhiz application is intended for informational purposes only and may not accurately reflect actual usage. The values specified on the product label are obtained under standardized laboratory conditions. Be aware that your actual consumption figures may fluctuate based on individual usage patterns and varying climatic conditions.

7 Maintenance and Cleaning

i Please read the “Safety Instructions” section first!

Service life of your product extends and frequently experienced problems will be reduced if it is cleaned at regular intervals.

7.1 Cleaning the Detergent Drawer

Clean the detergent drawer at regular intervals (once every 4 to 5 wash) as mentioned below to prevent accumulation of powder detergent.

Clean the syphon if excess amounts of water and fabric softener mixture remains in the softener compartment.

1. Press the marked part of the syphon within the softener compartment and then pull the drawer towards yourself to take it out.
2. Lift and remove the syphon from behind as shown.
3. Rinse drawer and syphon in the sink with plenty of warm water. Use gloves or suitable brush to prevent contact of residues in the drawer with your skin.

4. Firmly fit the syphon and the drawer back after cleaning.

7.2 Cleaning the Loading Door and the Drum

For products with drum cleaning programme, please see the Operating the product section.

i Repeat Drum Cleaning process in every 2 months.
NOTICE: Use an anti-limescale suitable for the washing machines.

After every washing make sure that no foreign substance is left in the product.

If the holes on the door gasket shown in the figure is blocked, open the holes using a toothpick.

Foreign metal substances will cause rust stains in the drum. Clean the stains on the drum surface by using cleaning agents for stainless steel.

Never use steel wool or wire wool. These will damage the painted, chrome coated and plastic surfaces.

We recommend you to wipe the door gasket with a dry and clean cloth at the end of the programme. This will remove residues on the door gasket in your product and prevent formation of malodours.

7.3 Cleaning the Body and Control Panel

Wipe the body of the product with soapy water or non-corrosive mild gel detergents as necessary, and dry with a soft cloth. Use only a soft and damp cloth to clean the control panel. Do not use cleaning products that contain bleach

7.4 Cleaning the Water Intake Filters

There is a filter at the end of each water intake valve at the rear of the product and also at the end of each water intake hose where they are connected to the tap. These filters prevent foreign substances and dirt in the water to enter the product. Filters should be cleaned if they are dirty.

1. Close the taps.
2. Remove the nuts of the water intake hoses to access the filters on the water intake valves and clean them with an appropriate brush. If the filters are too dirty, remove them from their places with a pliers and clean in this way.
3. Take out the filters on the flat ends of the water intake hoses together with the gaskets and clean thoroughly under running water.
4. Replace the gaskets and filters carefully and tighten their nuts by hand.

7.5 Draining Remaining Water and Cleaning the Pump Filter

The filter system in your product prevents solid items such as buttons, coins and fabric fibres clogging the pump impeller during draining of washing water. Thus, the water will be drained without any problem and the service life of the pump will extend.

If the product fails to drain water inside it, the pump filter is clogged. Filter must be cleaned whenever it is clogged or in every 3 months. Water must be drained off first to clean the pump filter.

In addition, prior to transporting the product (e.g., when moving to another house) water should be drained completely.

NOTE:

Foreign substances left in the pump filter may damage your product or may cause noise problem.

If you live in areas prone to frost, remember to turn off the water tap, disconnect the main hose, and drain the water from the product when it's not in use.

After each use, turn off the tap to which the mains hose is connected.

In order to clean the dirty filter and drain the water:

1. Unplug the product to cut off the supply power.

Temperature of the water inside the product may rise up to 90 °C. To avoid the risk of scalding, clean the filter after the water inside the product is cooled down.

2. Open the filter cover.

3. Follow the below procedures in order to drain water.

If the product does not have an emergency water draining hose, in order to drain the water:

- Place a large container at the end of the hose to collect the water from the filter.
- When the pump filter starts leaking water loosen it by turning (opposite clockwise). Fill the running water to the container you placed in front of the filter. Keep a cloth ready to clean the water that may spill.

8 Troubleshooting

Please read the "Safety Instructions" section first!

Programmes do not start after the loading door is closed.

- Start / Pause / Cancel button is not pressed. >>> Press Start / Pause / Cancel button.
- It may be difficult to close the loading door in case of excessive loading. >>> Reduce the amount of laundry and make sure that the loading door is closed properly.

Programme cannot be started or selected.

- The product has switched to self-protection mode due to a supply problem (line voltage, water pressure, etc.). >>> Depending on the product model, select another program by turning the Program Selection button or pressing and holding the On/Off button for 3 seconds to cancel the program. Previous programme will be cancelled. See Cancelling the Programme [▶ 35]

Water inside the product.

- Some water has remained in the product due to the quality control processes in the production. >>> This is not a failure; water is not harmful to the product.

- Completely turn and remove the pump filter when the water in the product leaks out.

1. Clean any residues inside the filter as well as fibres, if any, around the pump impeller region.
2. Replace the filter.
3. If the filter cap is composed of two pieces, close the filter cap by pressing on the tab. If it is one piece, seat the tabs in the lower part into their places first, and then press the upper part to close.

The product does not take water in.

- Tap is turned off. >>> Turn on the taps.
- Water inlet hose is bent. >>> Flatten the hose.
- Water inlet filter is clogged. >>> Clean the filter.
- Loading door is not closed. >>> Close the door.

The product does not drain water.

- Water drain hose is clogged or twisted. >>> Clean or flatten the hose.
- Pump filter is clogged. >>> Clean the pump filter.

Product vibrates or makes noise.

- Product is standing unbalanced. >>> Adjust the stands to balance the product.
- A hard substance has entered into the pump filter. >>> Clean the pump filter.
- Transportation safety bolts are not removed. >>> Remove the transportation safety bolts.
- Laundry quantity in the product is too little. >>> Add more laundry to the product.
- Excessive laundry is loaded in the product. >>> Take out some of the laundry from the product or distribute the load by hand to balance it homogeneously in the product.

- Product is leaning on a rigid item. >>> Make sure that the product is not leaning on anything.

There is water leaking from the bottom of the product.

- Water drain hose is clogged or twisted. >>> Clean or flatten the hose.
- Pump filter is clogged. >>> Clean the pump filter.

Product stopped shortly after the programme started.

- Product has stopped temporarily due to low voltage. >>> Product will resume running when the voltage restores to the normal level.

Product directly drains the water it takes in.

- Draining hose is not at adequate height. >>> Connect the water draining hose as described in the user manual.

No water can be seen in the product during washing.

- Water is inside the invisible part of the product. >>> This is not a failure.

Loading door cannot be opened.

- Loading door lock is activated because of the water level in the product. >>> Drain the water by running the Pump or Spin programme.
- Product is heating up the water or it is at the spinning cycle. >>> Wait until the programme completes.
- Loading door may be stuck because of the pressure it is subjected to. >>> Grab the handle and push and pull the loading door to release and open it.
- If there is no power, loading door of the product will not open. >>> To open the loading door, open the pump filter cap and pull down the emergency handle positioned at the rear side of the said cap. See Loading Door Lock [► 34]

Washing takes longer than specified in the user manual. (*)

- Water pressure is low. >>> Product waits until taking in adequate amount of water to prevent poor washing quality due to the decreased amount of water. Therefore, the washing time extends.
- Voltage is low. >>> Washing time is prolonged to avoid poor washing results when the supply voltage is low.
- Input temperature of water is low. >>> Required time to heat up the water extends in cold seasons. Also, washing time can be lengthened to avoid poor washing results.
- Number of rinses and/or amount of rinsing water have increased. >>> Product increases the amount of rinsing water when good rinsing is needed and adds an extra rinsing step if necessary.
- Excessive foam has occurred and automatic foam absorption system has been activated due to too much detergent usage. >>> Use recommended amount of detergent.

Programme duration does not countdown. (On models with display) (*)

- Timer may stop during water intake. >>> Timer indicator will not countdown until the product takes in adequate amount of water. The product will wait until there is sufficient amount of water to avoid poor washing results due to lack of water. Timer indicator will resume countdown after this.
- Timer may stop during heating step. >>> Timer indicator will not countdown until the product reaches the selected temperature.
- Timer may stop during spinning step. >>> Automatic unbalanced load detection system is activated due to the unbalanced distribution of the laundry in the product.

Programme duration does not countdown. (*)

- There is unbalanced load in the product. >>> Automatic unbalanced load detection system is activated due to the unbalanced distribution of the laundry in the product.

Product does not switch to spinning step. (*)

- There is unbalanced load in the product. >>> Automatic unbalanced load detection system is activated due to the unbalanced distribution of the laundry in the product.
- The product will not spin if water is not drained completely. >>> Check the filter and the draining hose.
- Excessive foam has occurred and automatic foam absorption system has been activated due to too much detergent usage. >>> Use recommended amount of detergent.

Washing performance is poor: Laundry turns gray. ()**

- Insufficient amount of detergent has been used over a long period of time. >>> Use the recommended amount of detergent appropriate for water hardness and the laundry.
- Washing has been made at low temperatures for a long time. >>> Select the proper temperature for the laundry to be washed.
- Insufficient amount of detergent is used with hard water. >>> Using insufficient amount of detergent with hard water causes the soil to stick on the cloth and this turns the cloth into gray in time. It is difficult to eliminate graying once it happens. Use the recommended amount of detergent appropriate for water hardness and the laundry.
- Excessive amount of detergent is used. >>> Use the recommended amount of detergent appropriate for water hardness and the laundry.

Washing performance is poor: Stains persist or the laundry is not whitened. ()**

- Insufficient amount of detergent is used. >>> Use the recommended amount of detergent appropriate for water hardness and the laundry.
- Excessive laundry is loaded in. >>> Do not load the product in excess. Load with amounts recommended in the "Programme and consumption table".
- Wrong programme and temperature were selected. >>> Select the proper programme and temperature for the laundry to be washed.
- Wrong type of detergent is used. >>> Use original detergent appropriate for the product.
- Detergent was put in the wrong compartment. >>> Put the detergent in the correct compartment. Do not mix the bleaching agent and the detergent with each other.

Washing performance is poor: Oily stains appeared on the laundry. ()**

- Regular drum cleaning is not applied. >>> Clean the drum regularly. For this procedure, see Cleaning the Loading Door and the Drum [▶ 40]

Washing performance is poor: Clothes smell unpleasantly. ()**

- Odours and bacteria layers are formed on the drum as a result of continuous washing at lower temperatures and/or in short programmes. >>> Leave the detergent drawer as well as the loading door of the product ajar after each washing. Thus, a humid environment favourable for bacteria cannot occur in the product.

Colour of the clothes faded. ()**

- Excessive laundry was loaded in. >>> Do not load the product in excess.
- Detergent in use is damp. >>> Keep detergents closed in an environment free of humidity and do not expose them to excessive temperatures.
- A higher temperature was selected. >>> Select the proper programme and temperature according to the type and soiling degree of the laundry.

The product does not rinse well.

- The amount, brand and storage conditions of the detergent used are inappropriate. >>> Use a detergent appropriate for the product and your laundry. Keep detergents closed in an environment free of humidity and do not expose them to excessive temperatures.
- Detergent was put in the wrong compartment. >>> If detergent is put in the pre-wash compartment although prewash cycle is not selected, the product can take this detergent during rinsing or softener step. Put the detergent in the correct compartment.
- Pump filter is clogged. >>> Check the filter.
- Draining hose is folded. >>> Check the drain hose.

Laundry became stiff after washing. ()**

- Insufficient amount of detergent is used. >>> Using insufficient amount of detergent for the water hardness can cause the laundry to become stiff in time. Use appropriate amount of detergent according to the water hardness.
- Detergent was put in the wrong compartment. >>> If detergent is put in the pre-wash compartment although prewash cycle is not selected, the product can take this detergent during rinsing or softener step. Put the detergent in the correct compartment.
- Detergent was mixed with the softener. >>> Do not mix the softener with detergent. Wash and clean the drawer with hot water.

Laundry does not smell like the softener. ()**

- Detergent was put in the wrong compartment. >>> If detergent is put in the pre-wash compartment although prewash cycle is not selected product, the can take this detergent during rinsing or softener step. Wash and clean the drawer with hot water. Put the detergent in the correct compartment.

- Detergent was mixed with the softener. >>> Do not mix the softener with detergent. Wash and clean the drawer with hot water.

Detergent residue in the detergent drawer. ()**

- Detergent was put in wet drawer. >>> Dry the detergent drawer before putting in detergent.
- Detergent has gotten damp. >>> Keep detergents closed in an environment free of humidity and do not expose them to excessive temperatures.
- Water pressure is low. >>> Check the water pressure.
- The detergent in the main wash compartment got wet while taking in the prewash water. Holes of the detergent compartment are blocked. >>> Check the holes and clean if they are clogged.
- There is a problem with the detergent drawer valves. >>> Call the Authorised Service Agent.
- Detergent was mixed with the softener. >>> Do not mix the softener with detergent. Wash and clean the drawer with hot water.

Detergent residue on the clothes.

- The product might have been overloaded. >>> Do not overload the product.
- Wrong programme and temperature were selected. >>> Select the proper programme and temperature for the laundry to be washed.
- Wrong type of detergent might have been used. >>> Select the proper detergent for the laundry to be washed.

Too much foam forms inside the product. ()**

- Improper detergents for the product is used. >>> Use detergents appropriate for the product.
- Excessive amount of detergent is used. >>> Use only sufficient amount of detergent.

- Detergent was stored under improper conditions. >>> Store detergent in a closed and dry location. Do not store in excessively hot places.
- Some meshed laundry such as tulle may foam too much because of their texture. >>> Use smaller amounts of detergent for this type of item.
- Detergent was put in the wrong compartment. >>> Make sure you place the detergent in the appropriate compartment.
- Softener is being taken early by the product. >>> There may be problem in the valves or in the detergent drawer. Call the Authorised Service Agent.

Foam is overflowing from the detergent drawer.

- Too much detergent is used. >>> Mix 1 tablespoonful softener and ½ l water and pour into the main wash compartment of the detergent drawer. >>> Put detergent into the product suitable for the programmes and maximum loads indicated in the "Programme and consumption table". When you use additional chemicals (stain removers, bleaches and etc.), reduce the amount of detergent.

Laundry remains wet at the end of the programme. (*)

- Excessive foam has occurred and automatic foam absorption system has been activated due to too much detergent usage. >>> Use recommended amount of detergent.

Drying lasts too long.

- The product might have been overloaded. >>> Do not overload the product.
- Spinning might not be sufficient for laundry. >>> Select a higher spin speed in the washing step of the Washer-Dryer.
- Tap is turned off. >>> Turn on the taps.

Laundry comes off wet after the drying step.

- The programme selected might not be suitable for the type of laundry. >>> Check the care labels on clothes and select a programme accordingly, or select timed programmes additionally.

- The product might have been overloaded. >>> Do not overload the product.
- Spinning might not be sufficient for laundry. >>> Select a higher spin speed in the washing step of the Washer-Dryer.

The product does not start or programme cannot be started.

- Power cable might be unplugged. >>> Make sure that the power cable is plugged in.
- Programme might not be set, or the Start/Pause/Cancel button might be not pressed. >>> Make sure the programme is set and the product is not in Standby mode.
- Child lock might be activated. >>> Disable Child Lock.

Laundry shrinks, fades, tarnishes or gets damaged.

- The programme selected might not be suitable for the type of laundry. >>> Check the care labels on clothes and select a programme accordingly, or select timed programmes additionally. You should not dry laundry that is not suitable for drying.

The product does not dry.

- Laundry might not be dried or the drying step might not be enabled. >>> Check if the drying function is selected after the selected washing programme.

Loading door cannot be opened.

- The door of your product might not be opening due to safety reasons. >>> If the door locked indicator is still active on the display after the drying step, the product will keep the door locked for your safety until it cools down.
- If there is no power, loading door of the product will not open. >>> To open the loading door, open the pump filter cap and pull down the emergency handle positioned at the rear side of the said cap. See Loading Door Lock [▶ 34]

(*) The product does not switch to spinning step when the laundry is not evenly distributed in the drum to prevent any damage to

the product and to its surrounding environment. Laundry should be rearranged and respun.

(**) Regular drum cleaning is not applied. Clean the drum regularly. See Cleaning the Loading Door and the Drum [► 40]

If you cannot eliminate the problem although you follow the instructions in this section, consult your dealer or the Authorised Service Agent. Never try to repair a nonfunctional product yourself.

Check the HomeWhiz section for the relevant troubleshooting information.
